Steps to rollback and recover

1. Run the following as sysdba

```
SHUTDOWN IMMEDIATE;
STARTUP MOUNT;
ALTER DATABASE ARCHIVELOG;
ALTER DATABASE OPEN;

ALTER DATABASE FLASHBACK ON;

ALTER SYSTEM SET DB_RECOVERY_FILE_DEST='/<path>';
ALTER SYSTEM SET DB_RECOVERY_FILE_DEST_SIZE=10G;
```

- confirm the database state:

```
SELECT * FROM V$FLASHBACK_DATABASE_LOG;

SELECT LOG_MODE FROM V$DATABASE;

SELECT FLASHBACK_ON FROM V$DATABASE;
```

- Start with the recovery process as we have done before

```
SHUTDOWN IMMEDIATE;

STARTUP MOUNT; -- using the pfile like we did

rman target /

FLASHBACK DATABASE TO TIMESTAMP 'YYYY-MM-DD HH24:MI:SS';

ALTER DATABASE OPEN;
```

- confirm of the db was flashed back successfully to the actual time you wanted:

SELECT CURRENT_TIMESTAMP FROM DUAL;
